

# Transporeon Freight Settlement

**Transporeon Freight Settlement optimises your transport settlements and acts as a central communication platform between shipper and carrier.** The active exchange of data facilitates the coordination and documents each step verifiably. Coordinate shipping invoices quickly and transparently while taking contracted freight rates into account with Transporeon Freight Settlement.

## CHALLENGES

### LIMITED OVERVIEW

Multiple invoice items and individual surcharges make it difficult to verify and control invoice amounts and prices.

### COMPLEX TARGET-ACTUAL COMPARISON

Information and data on services that were actually provided must be manually identified and compared with individual invoice items.

### DUNNING EXPENSES AND LATE PAYMENT FINES

Tedious coordination and time-consuming communication lead to avoidable expenses for dunning and late payment fines.

### FRAGMENTED COMMUNICATION

Information exchange between shipper and carrier takes place in different formats, via different communication platforms and sometimes even different languages, while internal data must be laboriously collected across departments.

## FEATURES

### CENTRAL COMMUNICATION PLATFORM

Fully documented coordination process on a central platform with worldwide cloud access.

### STANDARDIZED PROCESS

Clear communication without language barriers due to predefined input and mandatory fields.

### AUTOMATIC DATA TRANSFER

Information from Transport Execution is automatically transmitted.

### TRANSPARENT RELEASE PROCESS

Invoice release with comprehensive documentation, including rejection reasons and comments.

### COMPLETE DOCUMENTATION

All information is centrally stored and each step is traceable through change history.

### RECONCILIATION BEFORE INVOICING

Quantities and prices of individual invoice items are compared and clarified before the invoice is released.

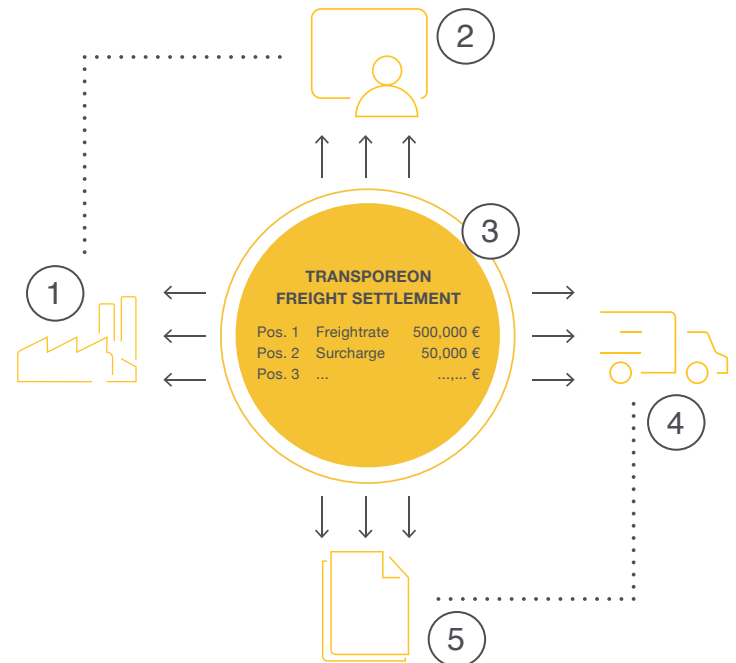

### AUTOMATIC INVOICE COMPARISON

Automatically compares individual invoice items with data from Transport Execution, including contracted rates and surcharges.

## HOW IT WORKS

### THE CENTRAL COMMUNICATION PLATFORM

- 1**  
The shipper starts the settlement process via Transporeon Freight Settlement
- 2**  
The data of transports, including contracted freight rates and any surcharges incurred, are transmitted to the carrier via Transporeon Freight Settlement
- 3**  
The transmitted data is listed in Transporeon Freight Settlement as individual invoice items
- 4**  
The carrier checks the invoice items in Transporeon Freight Settlement and gives feedback
- 5**  
The released self-billing invoice can then be sent for payment by the shipper's accounting department

## BENEFITS

- > Save time by resolving billing issues before the invoice is sent
- > Simplified control of individual invoice items
- > All settlement transactions are displayed in their entirety to provide complete transparency
- > Company-wide and standardized coordination process
- > As a stand-alone solution also compatible with other products

“With Transporeon Freight Settlement we were able to **optimize our previous settlement process and almost eliminate incorrect invoices.** A win-win situation for all parties involved.”
